About Us

All our team members are coming from the natural stone business. We worked for well-known marble companies as sales managers in the past. We know, how is marble production. We know, how to inspect marble. We know all the processes of export. We participated in too many natural stone exhibitions. We traveled a lot all over the world, in more than 25 countries where we visited our clients face to face and followed unique projects. After 15 years of workrush in this business, we decided to open our own company to serve our clients more than before. Shortly, this is our starting story. You can see more details about us below.
